EDUCATION

Northeastern University, Boston, MA Sept. 2014 - Present
College of Computer and Information Science GPA 3.7/4.0
Candidate for a Master of Science in Computer Science Expected graduation: Dec. 2016
Related Courses: Program Design Paradigm, Foundations of Artificial Intelligence

Jawaharlal Nehru Technological University, Hyderabad, India April 2012
Bachelor's Degree in Electronic and Communication Engineering GPA 3.6/4.0
Related Courses: Calculus, Linear Algebra, C Programming and Data Structures, Object Oriented Programming, Switching Theory and Logic Design, Computer Organization and Computer Networks

TECHNICAL KNOWLEDGE

Languages: C#, Java, JavaScript, SQL, Racket, Python
Systems: Windows XP/7/8, UNIX
Softwares: Visual Studio 2013, Eclipse, SQL Server Management Studio, GitHub, TortoiseSVN, winAVR, mikroC
Web Technologies: ASP.NET, HTML5, CSS3, AJAX, JSON, Wordpress, Telerik Sitefinity - CMS
Database: SQL Server 2008

WORK EXPERIENCE

Monster Worldwide, Boston, MA June 2015 – Present
Software Engineer Intern (C#, AJAX, JavaScript, Wordpress)

Wipro Limited, Hyderabad, India May 2013 - June 2014
Software Analyst (C#, XML, ASP.NET, SQL Server 2008)

- Migrated a website from legacy server (.NET v1.1) to win2k server (v3.0) and incorporated new enhancements.
- Handled batch jobs and Windows services that push data to client's server using SFTP.
- Delivered technical documentation for the project starting from functional design to unit test cases.
- Automated SQL script execution using XML parsing to generate reports, thereby reducing efforts of up to 20 man-hours per week.
- Received 'Feather In My Cap' award for valuable contribution in the migration project.

Project Engineer (C#, ASP.NET, Telerik-CMS, SQL Server 2008, SOAP) June 2012 - April 2013

- Maintained the client's interactive website based on Telerik Content Management System leveraging the flexibility of .NET framework.
- Designed mock-up web applications for e-Passport and an online ticket reservation system as a part of training.

ACADEMIC PROJECTS

Northeastern University, Boston, MA Jan. 2015 – April 2015
MIT App Inventor 2 – Web App (JavaScript, HTML5, CSS3)

- Developed a HTML version of components that are present in the current App Inventor version, to generate an equivalent web app instead of a native android app.

Pacman Artificial Intelligence Project (Python) Sept. - Dec. 2014

- Implemented standard artificial intelligence and machine learning techniques to emerge victorious in the classic game of Pacman.

Jawaharlal Nehru Technological University, Hyderabad, India Dec. 2011 - April 2012
Design of a cost efficient SEGWAY (winAVR, mikroC)

- Developed a PID control system in C using AVR Microcontroller (ATMega 32) and gyroscopic sensors to keep the structure upright.
- Won All India 3rd prize at Texas Instruments MCU Design Contest-2012 for the innovative idea and closeness to the original Segway.
